PROFILE

A recent Bachelor of Computer Science fresh graduate from Universiti Kebangsaan Malaysia with a CGPA of 3.82 (First Class), seeking a full-time position as a Data Scientist or Data Analyst. Proficient in programming and experienced in data analysis and data visualization. Bilingual in Malay and English, with strong communication and report writing skills. Actively involved in extracurricular activities and project development to strengthen both technical and soft skills. Eager to apply knowledge and contribute to a dynamic and innovative organization while continuously learning and growing professionally in the industry.

EDUCATION

Universiti Kebangsaan Malaysia (UKM) **Sep 2021 – Sep 2025**
Bachelor of Computer Science (Data Science) with Honours
CGPA: 3.82 (First Class)

Pahang Matriculation College (KMPh) **May 2020 – May 2021**
Computer Science (Module 3)
CGPA: 3.52
MUET: Band 4

Sekolah Menengah Kebangsaan Paka **Jan 2015 – Dec 2019**
Science
SPM: 5A 2B 2C

EXPERIENCE

Mitsubishi Motors Malaysia (Internship) **Aug 2024 – Feb 2025**
Data Analyst Intern

- Involved in multiple projects primarily focusing on the Customer Data Platform (CDP) project that aimed to centralize and manage customer data in generating better business insights.
- Developed several dashboards using Power BI including Sales Dashboard, Marketing Dashboard and Aftersales Dashboard to support management in data-driven decision-making.
- Utilize SQL Query to extract the large dataset from CDP for use by the core users of CDP (Other Departments).
- Automated data ingestion processes for Power BI dashboards to ensure timely and accurate reporting by using Power Automate.
- Created user manuals for CDP, Power BI dashboard development and Power Automate workflows to assist intern replacements and other team members.
- Performed daily data analysis and reporting using Excel and leveraging analytical functions including Pivot Tables to monitor and track performance metrics and support business operations.
- Participated in regular meetings with external vendors to follow up on project progress, discuss technical issues and update on pending tasks.
- Collaborated closely with the team members to gather requirements, analyze data trends and provide actionable insights for various departments.

PROJECTS

Customer Data Platform (Internship Project)
Tools: Treasure Data, SQL, Power BI, Excel, Power Automate.

- Managed and monitored a Customer Data Platform (CDP) powered by Treasure Data to centralize customer data from multiple organizational sources into a unified platform.
- Involved in the end-to-end CDP workflow, including data ingestion, cleaning, transformation, unification, customer segmentation and activation.
- Improved data management capabilities to support data-driven decision-making in sales and customer engagement teams.
- Utilized SQL and Excel for data processing, validation and quality checks to ensure data accuracy throughout the development lifecycle.
- Collaborated with stakeholders to ensure CDP data structures aligned with business and reporting requirements.
- Supported downstream analytics by preparing CDP datasets for visualization and reporting use cases.

Power BI Dashboard (Internship Project)
Tools: Power BI, Excel, Power Automate.
- Designed and developed multiple Power BI dashboards to support sales operations, marketing performance and aftersales retention analysis.
- Translated business requirements into interactive and actionable visualizations for management and operational teams.
- Automated data refresh and ingestion workflows using Power Automate to ensure timely, consistent and accurate reporting.
- Integrated data from CDP outputs and Excel sources to deliver end-user-focused Power BI dashboards.
- Enhanced reporting efficiency by reducing manual data handling and improving dashboard reliability.

Sentiment Analysis and Reviews Classification for Sports Equipment Product Using LSTM (Final Year Project)
Tools: Python, HTML, CSS, PHP, SQL, Natural Language Processing, Flask, LSTM, Deep Learning, Excel.
- Developed a web-based system for sentiment analysis and review classification of sports equipment using HTML, CSS, PHP, SQL, Xampp, Bootstrap, JavaScript and JQuery.
- Implemented deep learning (LSTM) combined with NLP techniques (TF-IDF and Word Embedding).
- Collected and prepared own dataset from various e-commerce platforms and from Kaggle.
- Designed the system to effectively analyze customer reviews and classify them based on sentiment (positive, negative, neutral).
- Helped in understanding customer feedback better and can be useful for improving products and services.
- Deployed the system using UKM's server infrastructure, utilizing tools such as Sublime Text, FileZilla, and XAMPP for development and deployment.

Web-based System (Web Development Project)
Tools: HTML, CSS, PHP, SQL, Xampp, Bootstrap, Java Script, JQuery, Sublime.
- Developed a website for a rugby shop ordering system using HTML, CSS, PHP, SQL, Xampp, Bootstrap, JavaScript and JQuery.
- Deployed the system using UKM's server infrastructure, utilizing tools such as Sublime Text, FileZilla, and XAMPP for development and deployment.
- Designed a comprehensive product catalog with role-based access, enabling admins, supervisors, and staff to perform various functions.
- Implemented key features including product listing and addition, image uploads, customer and staff management and invoice generation.
- Delivered a user-friendly platform that streamlined inventory and sales management for the rugby shop.

Data Scraping for Price Comparison (Data Analysis Project)
Tools: Python, Excel, Google Colab.
- Automated data scraping of car listings from Mudah.my and Carlist.
- Extraction of important vehicle information, including car model, price, year and mileage.
- Data cleaning and organization to ensure consistent and usable comparison results.
- Price comparison between similar vehicle listings from different platforms.
- User-friendly presentation of scraped data for easier vehicle price analysis.

Airlines On-Time Performance Analysis (Hadoop Project)
Tools: Linux, Hadoop, Hive, Apache Pig, SQL.
- Worked in a Hadoop environment using Hive and Apache Pig for large-scale data analysis.
- Analyzed the on-time performance of airlines using the comprehensive dataset from the American Statistical Association's Data Expo 2009 (flights.csv)
- Derived valuable insights into various aspects of air travel.
- Leveraged Hive for data processing and SQL for querying large datasets.
- Addressed key questions related to flight performance, uncovering patterns and trends to support informed decision making for airlines, airports and passengers.

Personal Portfolio (Web Design)
Tools: HTML, VS Code, JavaScript, CSS, Bootstrap.
- Responsive layout design for an optimal viewing experience on any device.
- Interactive and engaging animations to enhance user experience.
- User-friendly interface to present skills, projects and contact information.
- Customizable design that allowing for future updates and additions.

SKILLS AND EXPERTISES

Programming Languages
Python, SQL, Java, HTML, PHP, C, C++, R, JavaScript

Tools and Softwares
Visulization: Power BI, Tableu
Data Analytics: Google Colab, Treasure Data, Jupyter Notebook, Hadoop, Hive, Apache Pig
Development: Visual Studio Code, Sublime Text, Flask, Django, Bootstrap, JQuery
Database: XAMPP, FileZilla
Operating System/Virtualization: Linux, VMware
UI/UX Design: Figma, Canva
Microsoft Office: Excel, PowerPoint, Access, Word, Power Automate, Outlook

Skill Expertises
Data Analysis, Sentiment Analysis, Artificial Intelligence, Customer Data Platform, Deep Learning, Machine Learning, Natural Language Processing, Data Management, Data cleaning, Data Processing, Data Visualization, Data Mining, Data Segmentation, Data Activation, Data Classification, Data Clustering, Interface Design, UI/UX, Web Development, Statistical analysis, Report Writing.

Soft Skills
Teamwork, Adaptability, Hardworking, Multitasking, Problem solving, Decision making, Communication, Critical thinking, Fast Learning, Leadership.

Language Proficiency
Malay, English

INVOLVEMENTS

- 2024: Participate in the Dean's Cup (Football), Faculty of Information Technology and Science
- 2023: Participate in the Dean's Cup (Football), Faculty of Information Technology and Science
- 2023: Marketing Exco, Bonding Day, iMachine Club
- 2023: Fasilitator, School@UKM: Explore into Computer, iMachine Club
- 2022: Fasilitator, UKM Computing Camp, Faculty of Information Technology and Science
- 2022: Participate in Explore the Green World Program
- 2022: Protocol Exco, Digital Challenge Week, Faculty of Information Technology and Science
- 2021: Facilitator, School@UKM "Learn Python With iMachine"
- 2020: Chairman of the Sport Management Club, Pahang Matriculation College
- 2019: State Level Mathematic Competition organized by MSU

ACHIEVEMENTS

- 2025: Dean's List Award, 7 out of 8 Semesters
- 2021: Band 4 in Malaysian University English Test (MUET)

REFERENCE

- Will provide Upon Request
